
Melamine Handle & Care

General Cleaning - Using a mild household cleaner wipe down the door or panel with a soft cloth taking care not to rub too hard. Use a soft dry cloth so as not to leave any residue on the door or panel. You may also use Methylated Spirit on a soft cloth, using a circular cleaning motion. Thoroughly clean the area with a damp cloth (water and mild detergent only) to remove any residual Methylated Spirits. Always ensure that you refer to the recommendations provided by the cleaning product manufacturer before use.

To ensure that your material warranty will not be void, DO NOT use any of the following: Commercial Cleaning Products, Abrasive Cleaners, Scouring Pads or Abrasive Papers, Acids and Alkalis, Solvents, Thinners, Turpentine (Turps), Ammonia, Bleach, Acetone, or any other cleaning agents containing organic solvents or the above-mentioned products. Avoid contact with sharp instruments.

The use of a cooker hood, or extractor, whenever cooking, is advised. This will help avoid steam and cooking oil vapours from adversely affecting surfaces.

Exposure to excessive water or standing water will cause damage to the substrate and cause the door or panel to 'blow' and warp. Constant exposure to direct sunlight can alter the colour of the melamine over time.
